

**Amendments to the Drawings**

Please amend the drawings as explained below and appended to this paper as New Sheet and Replacement Sheet. No new matter has been added.

1. Fig. 30 is revised to correct the originally shown reference numeral '42' to the reference numeral '342', described in the original specification at page 15, lines 1-9.
2. Fig. 53 is added to show the embodiment where the ears may project from the shank toward the cap to press laterally against flanged surfaces of the cap, which is described in the original specification for example at page 21, lines 18-27.
